Full-Stack Developer with hands-on experience working on real production systems. Strong focus on backend development with TypeScript and NestJS, combined with frontend experience using React and Next.js. Currently contributing to the development of a logistics system used in real delivery operations, working with APIs, external integrations, and database optimization.

Seeking to grow within a professional environment where I can contribute to real-world applications and continue developing my technical skills.

PROFESSIONAL EXPERIENCE

AMXpress

Full-Stack Developer

Remote | Buenos Aires, Argentina

September 2025 – Present

- Developed and maintained a production logistics system used in real delivery operations
- Designed and implemented REST APIs using NestJS and TypeScript
- Integrated external APIs (Mercado Libre) using OAuth and webhooks for real-time data synchronization
- Optimized database queries to improve performance in high-volume operations
- Refactored legacy modules to improve scalability and maintainability
- Resolved production issues in a live environment
- Collaborated with senior developers on technical decisions

Avanza Consultoria Tecnologica
